In addition to the terms of the Toyota Certified Used Vehicle Limited Warranty, Toyota is proud to provide the following Roadside Assistance Protection services and benefits to our customers as another indication of our commitment to quality service for our Toyota Certified Used Vehicle owners.

To safeguard the quality, reliability, and value of your vehicle, Toyota recommends using only Toyota Genuine Parts for maintenance and repairs. Like all Toyota products, Toyota Genuine Parts are built to the highest standards of quality and performance. They are also designed to fit your vehicle's exact specifications.

Your Toyota dealership maintains an extensive inventory of Toyota Genuine Parts to meet your vehicle service needs. And, because it is linked electronically to Toyota's Parts Distribution Centers, the dealership has quick access to any parts it may not have in stock.

When installed by a Toyota dealership, Toyota Genuine Parts (with the exception of batteries) are warranted for 12 months from the date of installation, regardless of mileage, or the remainder of any applicable New Vehicle Limited Warranty, whichever provides the greater coverage. Selected Toyota replacement parts are covered by a lifetime warranty (see your Toyota dealership for details). Non-Toyota Genuine Parts — and any damage or failures resulting from their use — are not covered by any Toyota warranty.

Toyota also offers the highest level of quality, fit, and performance in selected remanufactured parts. These parts enable you to economically maintain and repair your vehicle with Genuine Toyota quality. They also feature the same warranty coverage as new Toyota Genuine Parts. Available parts range from alternators to water pumps; ask your Toyota dealership for a complete list of remanufactured product offerings.

For all your maintenance and repair needs, insist on the quality and peace of mind you get only with Toyota Genuine Parts.

Insist on Genuine Toyota Quality

If you are involved in a collision, you want your vehicle to be returned to its pre-accident condition when repaired. To maintain your Toyota's value, it's important to make sure it is repaired with Toyota Genuine Parts. Some repair shops and insurance companies may suggest using imitation or used salvage parts to save money. However, these parts do not meet Toyota's high standards for quality, fit, and corrosion resistance. In addition, imitation and used salvage parts are not covered by any Toyota warranty (see below).

To maintain the appearance, performance, and safety of your Toyota, make sure only Toyota Genuine Parts are used for collision repairs. Protect your investment; insist on Genuine Toyota quality.

TOYOTA WARRANTY COVERAGE REMAINS INTACT WHEN VEHICLE REPAIRS ARE COMPLETED WITH TOYOTA GENUINE

PARTS. TOYOTA WARRANTIES DO NOT COVER IMITATION OR USED SALVAGE PARTS OR ANY DAMAGE OR FAILURES CAUSED BY THE USE OF SUCH PARTS.

New original-equipment manufacturer (OEM):

Parts that are made by the vehicle manufacturer or one of its licensees and distributed through its normal channels. These parts maintain the manufacturer's vehicle warranty.

Aftermarket or imitation:

Parts that are made by companies other than the vehicle manufacturer or its licensees.

Recycled or used salvage:

Used parts and assemblies that have been removed from another vehicle. There are no systems in place to regulate the quality or safety of these parts.

Remanufactured:

Parts that have been returned to like-new condition through repair, refurbishing, or rebuilding.

DUE TO THE CRITICAL NATURE OF SUPPLEMENTAL RESTRAINT SYSTEMS (ALSO KNOWN AS AIRBAGS), TOYOTA DOES NOT SUPPORT THE USE OF IMITATION OR USED PARTS FOR THEIR REPAIR. ONLY NEW TOYOTA GENUINE PARTS SHOULD BE USED TO REPAIR OR REPLACE SUPPLEMENTAL RESTRAINT SYSTEMS.

The Experts Say, "Buckle Up!"

The importance of using seat belts cannot be overemphasized. The safety experts from government and private organizations say, "Buckle Up!" Here are a few good reasons why:

- Properly adjusted seat belts can help reduce driving fatigue and help the driver maintain better vehicle control.
- Studies show that, generally, the safest place in a collision is inside your vehicle. Seat belts can help keep you there.
- Eight out of 10 injury accidents occur at speeds under 40 mph, but even below 5 mph, children can be injured during quick turns or sudden stops. Children who are too small to wear regular seat belts should always be provided with a Child Restraint System dynamically tested to meet federal standards.

In addition to seat belts, your Toyota vehicle may be equipped with a driver's side airbag or driver's and front passenger's side airbags (Supplemental Restraint System or SRS). Airbags have been designed to supplement the three-point seat belt by providing additional protection by restraining the driver's and front passenger's forward motion in the event of a more serious frontal accident.

The SRS does not replace use of the seat belt. To obtain maximum protection in an accident, the driver and all passengers in the vehicle should always wear their seat belts.

Get That Good Feeling

Familiarize yourself with the operation of your seat belts, as explained in your Owner's Manual. Wear them every time you drive your Toyota, and encourage those who ride with you to do the same.

Remember: for peace of mind, buckle up...it's a good feeling!

OWNER INFORMATION CHANGE

If you transfer ownership of this vehicle, please submit an Owner Information Update. This can be done via our toll-free number:

(800) 331-4331

When you call our toll-free number, please have your vehicle identification number (VIN) available to perform the Owner Information Update. The VIN is a 17-digit number located on the lower front driver's side corner of the vehicle's dash and is visible through the windshield.

Notifying Toyota of owner information changes will ensure that our records are updated for future reference by your Toyota dealer during service visits or for future contacts by the Toyota Division.

Thank you.
